## Why Choose **Fiberon**?

Fiberon is an innovation leader in the manufacture and development of PVC and composite decking and railing products. Since its inception in 1997, Fiberon has continued to advance the technology of providing homeowners with products that transition the beauty of the indoors to a carefree relaxed backyard lifestyle. Fiberon decking and railing systems have achieved an unequalled reputation for quality performance while presenting homeowners with a wide variety of choices of designs, colors and grain patterns. Fiberon, The Decking Solutions Company, is dedicated to offering the best and widest selection of products in the business.

## Sustainable Products that Save Natural Resources

Fiberon responds to the growing public concern for environmental conservation by offering consumers durable product options that save natural resources, produced in a virtually waste-free manufacturing process. From raw material sourcing to homeowner maintenance, Fiberon outdoor living products incorporate the following sustainable practices and benefits:

- Made from Locally-Sourced, Recycled Materials  
- Up to 74% Recycled Content
- Produced in an Energy Efficient, Virtually Waste-free Manufacturing Process
- Contributes to High Performance Green Buildings
- Safe for Your Home and for the Environment
- Sustainable—Durable Performance Year after Year

Decking: ODF Spanish Cedar

Backed by the industry's first  
Stain and Fade Warranty

## Fiberon Outdoor Flooring PVC Decking

Fiberon Outdoor Flooring is premium PVC decking unsurpassed in providing solutions to the problems of fading, staining and chalking. With exotic hardwood colors, Outdoor Flooring sets the standard in beauty and provides the ultimate in low maintenance. Carrying a Class A rating for flame spread, Outdoor Flooring meets California's code requirements in WUI areas. Backed by the industry's first Stain and Fade warranty, Outdoor Flooring is also backed by a limited lifetime performance warranty. Outdoor Flooring is the premium decking product in both performance and beauty.

- Beautiful solid and exotic hardwood colors and grains
- Installs with Fiberon Deck Pilot® for a smooth, fastener-free surface
- Lumenite® coating for stain and fade resistance
- Easy to clean surfaces resist mold
- Cooler deck surfaces made of lightweight PVC
- Class A flame spread rating - meets CA WUI requirements

## Horizon Railing

### Mission Profile

Railing: Horizon Mission White with Round Metal Black Balusters

### Fiberon Horizon Railing - Mission Profile

Delivers design versatility with rich color choices and infill options. Designed to coordinate with Horizon decking, also complements all other Fiberon decking to complete your backyard oasis.

- Flat, drink friendly, rail profile
- Low maintenance PVC composite
- Rails and balusters sold separately and in kits:
  - Rails available in 6 ft. (72 in.) and 8 ft. (96 in.).
  - Stair rails available in 6 ft. (72 in.)
  - Rail sections available in 36 in. and 42 in. heights
- Customize rail design:
  - Square composite or black round metal balusters
  - Rail daggers firmly anchor balusters
  - New ClearVisionSystem® panels available in clear or bronze
  - Available in 6 ft. (72 in.) and 36 in. height
- ADA Compliant Handrail System available
- Marine grade hardware available special order

4x4 Structural Post: Available in 54 in. (White only)

Post Sleeve Kit: Available in 48 in. (includes post cap and base moulding)

Post Sleeve: Available in 108 in.

Harbour Post Cap and Base Moulding also sold separately

## New **Fiberon** Outdoor Lighting by Aurora

Enjoy your outdoor living space in the evenings with the ambience of refined lighting, complete with a remote control dimmer to set the right mood. Fiberon Outdoor Lighting is available in four distinctive lights, featuring riser lights for added stair safety. Made of rust-free aluminum, all lights are powder coated for a long-lasting finish. Fiberon Outdoor Lighting uses environmentally-friendly, low voltage, LED technology, which uses 1/12th the amount of electricity to brighten your deck. Four light styles are available in white, black and bronze.

**Fiberon** Fiberall® Railing

### **Post Cap Light**

Beautiful post cap available in 4" flat top with opaque lens that shines an outward ring of warm light for sophisticated post lighting

### **Post Light**

3.5" eyeball design, directs warm white LED lights down the post to the deck for spot lighting around the deck or to aid in safe footing on stairs

### **Accent Light**

1" diameter small, round, light with warm white LED bulb, installs flush with decking, designed for great accent lighting for deck borders or stairs

### **Riser Light**

Rectangle lighting, with opaque lens especially designed to brighten pathways and stairs

# Fibron® Outdoor Flooring PVC Decking

## Lifetime Residential Limited Warranty

### 25-Year Residential Stain and Fade Limited Warranty

Fibron warrants that Fibron Outdoor Flooring PVC Decking from the date of the original purchase from an authorized Fibron product dealer shall remain free from material manufacturing defects, and under normal and proper service conditions will not check, splinter, delaminate, rot or suffer structural damage from fungal decay when used in conjunction with an above ground residential application, under normal use and is installed and maintained according to manufacturer's guidelines.

The Lifetime Residential Limited Warranty shall be in effect from original purchase date for a residential purchaser as long as they own the property upon which the material was installed.

#### 25-Year Residential Stain and Fade Performance Limited Warranty Coverage

Fibron warrants the stain and fade resistance of Fibron Outdoor Flooring PVC Decking when properly installed and used as decking in residential applications. This warranty applies to all Fibron Outdoor Flooring PVC Decking products manufactured by Fibron and is extended to the original homeowner (Purchaser), as long as they own the residence upon which the decking materials are installed.

#### Stain Resistance:

Fibron warrants that Fibron Outdoor Flooring PVC Decking is resistant to permanent staining for a period of twenty five years from date of residential consumer purchase resulting from spills of food and beverage items that would typically be present on a residential deck. Spills should be removed from the decking material with soap and water and mild household cleaners immediately and no later than one week of exposure to the surface. If after this initial cleaning the stains remain, refer to Fibron's Care and Maintenance Instructions found on [www.fibrondecking.com](http://www.fibrondecking.com). Materials not covered in the stain resistant warranty include, but are not limited to, abrasive compounds of acidic or basic pH, strong solvents, oil based paints or stains, metallic rust, concrete or masonry products, air or water borne minerals and other abnormal residential deck use items. See limitations below for further details.

#### Fade Resistance:

Fibron warrants that Fibron Outdoor Flooring PVC Decking will resist color change from light and weathering exposure as measured by color change in excess of 5 Delta E (Hunter) units for a period of twenty five years from the date of purchase.

Exclusions from Stain and Fade Warranty Coverage: Fibron does not warrant its Fibron Outdoor Flooring PVC Decking products to be stain or fade proof. The surface of Fibron Outdoor Flooring PVC Decking is engineered to offer ultra-low maintenance performance. When used with proper design and construction practices and for use in the residential exterior deck environment, Fibron Horizon products provide a high level of stain and fade resistance.

#### Stain Resistance:

Care must be taken to remove spilled materials with soap and water and standard household cleaners immediately and within a week after the occurrence of the spill. If after this initial cleaning the stains remain, refer to Fibron's Care and Maintenance Instructions found on [www.fibrondecking.com](http://www.fibrondecking.com). Fibron does not warrant stain resistance resulting from spilled or otherwise applied substances that are not properly cleaned with soap and water or mild household cleaners. Materials not covered in the stain resistant warranty include, but are not limited to, abrasive compounds of acidic or basic pH, strong solvents, oil based paints or stains, metallic rust or other abnormal residential deck use items, non-food and non-beverage substances, including for example, but not limited to, fungicides, bactericides, biocides, plant food, pet or human stains such as vomit, blood, urine and feces and mineral staining or hazing caused by masonry work, windblown dust or mineral laden water.

#### Fade Resistance:

Fibron Outdoor Flooring PVC Decking surface technology is designed to resist fading. No material is fade proof when exposed to years of UV exposure and the elements. Other exclusions include direct or indirect contact with extreme heat sources (over 250 degrees).

#### Surface Damage:

Never use METAL shovels or sharp edge tools to remove snow and ice on the surface of any Fibron composite or PVC decking product. If the surface of Fibron Outdoor Flooring PVC Decking is damaged or punctured after the decking is installed, the twenty five year stain and fade resistance will be voided.

#### Paint or Other Surfaces Applied to Fibron Outdoor Flooring PVC Decking:

If paint or other coating materials are applied to the Fibron Outdoor Flooring PVC Decking surface, the twenty five year stain and fade resistant will be voided.

Fibron PVC Outdoor Flooring decking contains no cellulose fillers that can support the growth of mold or mildew; however, mold and mildew can develop on surface contaminants. Rinsing away any surface contamination as it occurs will prevent the formation of mold or mildew.

For the warranty period stated, compliance with the recommended deck care and maintenance procedures must be followed. To qualify for coverage, you must have tried cleaning the affected area of your deck using the instructions indicated within this document and within the Care and Maintenance Instructions provided online at [www.fibrondecking.com](http://www.fibrondecking.com). If the affected area still remains unsatisfactory after you have tried these cleaning procedures, then you must have the affected area of your deck professionally cleaned at your expense. If the affected area remains unsatisfactory after the professional cleaning, you must contact Fibron Consumer Support (800-573-8841) and provide proof of the professional cleaning within 30 days of the professional cleaning.

#### Remedy

Purchaser's sole remedy for any claim whatsoever arising out of the purchase, use, storage or possession of Fibron products (whether such claim arises in contract, warranty, tort, strict liability or otherwise), including without limitation any claim that Fibron products failed to perform as warranted above, shall be replaced with new Fibron product in an amount equal to the volume of defective material as listed on the Prorated Warranty Schedule. Replacement material will be provided that is as close as possible in color, design and quality to the original installation, but we do not guarantee an exact match as colors and designs will change. Additionally, claimant agrees to the use of surface fasteners as adequate for reinstallation of the furnished board, irrespective of existing method. Warrantor may elect to refund the percentage of the original purchase price listed on the Prorated Warranty Schedule in lieu of replacing the product or if Fibron deems the repair is not commercially practicable or cannot be made in a timely manner.

This Warranty does not cover costs of installation, removal or reinstallation. The Warrantor's sole obligation is limited to replacement of the Product, and Warrantor shall have no further liability of obligation except as expressly stated herein. In no event will Fibron be liable for any incidental, special, indirect or consequential damages resulting from any defect in the Product supplied, including but not limited to, damage to property. Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation may not apply to you.

Any owner seeking remedy under this warranty must notify Fibron in writing within 30 days after discovering a possible nonconformity of the Product, and before beginning any permanent repair. This written notice should describe the possible nonconformity and include the date the Product was installed. Immediately upon discovering

For the most up-to-date information and specifications, visit [www.fibrondecking.com](http://www.fibrondecking.com).

any possible nonconforming Product, the owner must make temporary repairs at the owner's expense to protect all property that could be affected. The owner must allow Fibron to enter the property into which the Product is installed to inspect the possibility of nonconforming Product. This warranty gives you specific legal rights and you may also have other rights which vary from state to state.

#### Limitations and Disclaimers

Warrantor shall not be liable for installation, removal or reinstallation costs or for any indirect, punitive, exemplary or consequential damages of any kind. Fibron does not warrant against and is not responsible for, and no implied warranty shall be deemed to cover, any condition attributable to: (1) improper installation of Fibron products and/or failure to abide by Fibron's installation guidelines, including but not limited to improper gapping; (2) use of Fibron products beyond normal use or in an application not recommended by Fibron's guidelines and local building codes; (3) movement, distortion, collapse or settling of the ground or the supporting structure on which Fibron products are installed; (4) Defects to or failure arising from decking structure resulting from water caused by improper installation, workmanship, maintenance or repair; (5) any act of God (such as flooding, hurricane, earthquake, lightning, etc.); (6) discoloration caused by aggressive atmospheric pollutants including but not limited to metallic oxides or particles and airborne mold or mildew; (7) staining from foreign substances such as dirt, grease, oil, harsh chemicals found in cleaners or normal weathering (defined as natural efflorescence, exposure to sunlight, weather and atmospheric conditions which will cause any colored surface to gradually fade, flake, chalk, or accumulate dirt or stains); (8) damage resulting from fire or exposure to excessive heat sources such as cooking devices or retro-reflective surfaces; (9) the application of improper paints, stains, surface treatments or other chemical substances including but not limited to non-recommended cleaners or pesticides; (10) climate change or any other cause beyond the control of Fibron; (11) variations or changes in color of Fibron products; (12) improper handling, storage, abuse or neglect of Fibron products by Purchaser or third parties; (13) ordinary wear and tear; (14) impact from foreign objects; or (15) any fasteners not supplied or approved by Fibron.

The purchaser is solely responsible for determining whether Fibron product meets the requirements of any applicable safety code or similar regulation.

No Fibron dealer, installer, reseller, agent or employee is authorized to make any modification, extension or addition to this Warranty. No person or entity is authorized by Warrantor to make any statement or representation, as to the quality or performance of Fibron product, other than as contained in this Limited Warranty and it may not be altered except in a written instrument signed by Warrantor and buyer. Some states do not allow limitation on how long any implied warranty lasts and/or the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you. This warranty gives you specific legal rights and you may also have other rights that vary from state to state.

Luminate technology is patent pending.

#### Warranty Claim Procedure

To obtain replacement, the original owner must send a copy of this warranty certificate, copy of original proof of purchase and photos of the issue to the address below. Such proof of purchase must be from an authorized Fibron product dealer and must show (1) the date of the purchase and (2) that sufficient Fibron product has been purchased to cover the number of lineal feet claimed to be damaged. Fibron must make a determination on the claim before any permanent repairs or removal of materials may be undertaken.

# Fiberon Horizon® Decking

## 25-Year Residential Limited Warranty, 10-Year Commercial Limited Warranty and 25-Year Residential Stain and Fade Limited Warranty

Fiberon warrants that Fiberon Horizon Decking from the date of the original purchase from an authorized Fiberon product dealer shall remain free from material manufacturing defects, and under normal and proper service conditions will not check, splinter, delaminate, rot or suffer structural damage from fungal decay when used in conjunction with an above ground application, under normal use and is installed and maintained according to manufacturer's guidelines.

Fiberon Phantom Fasteners are warranted from the date of proof of purchase against defects in material and workmanship when installed according to manufacturer's installation instructions. This warranty excludes rust. For best results, use only Fiberon branded or approved surface and/or hidden fasteners listed on our website, [www.fiberondecking.com](http://www.fiberondecking.com). Fiberon branded hidden fasteners are specifically designed to provide optimum performance when used with Fiberon deck boards. The use of other types of fasteners may void the Fiberon warranty if it is determined that deck board failures resulted from the use of a non-approved fastener.

The term of warranty shall be twenty five (25) years from original purchase date for a residential purchaser and ten (10) years from original purchase date for a commercial purchaser. The Commercial Limited Warranty may be transferred one (1) time, within the five (5) year period beginning from the date of original purchase by Purchaser to a subsequent buyer of the property upon which the Fiberon Horizon Decking Products were originally purchased.

### 25-Year Residential Stain and Fade Performance Limited Warranty Coverage

Fiberon warrants the stain and fade resistance of Fiberon Horizon Decking when properly installed and used as decking in residential applications. This warranty applies to all Fiberon Horizon Decking products manufactured by Fiberon and is extended to the original homeowner (Purchaser), as long as they own the residence upon which the decking materials are installed.

#### Stain Resistance:

Fiberon warrants that Fiberon Horizon Decking is resistant to permanent staining for a period of twenty five years from date of residential consumer purchase resulting from spills of food and beverage items that would typically be present on a residential deck. Spills should be removed from the decking material with soap and water and mild household cleaners immediately and no later than one week of exposure to the surface. If after this initial cleaning the stains remain, refer to Fiberon's Care and Maintenance Instructions found on [www.fiberondecking.com](http://www.fiberondecking.com). Materials not covered in the stain resistant warranty include, but are not limited to, abrasive compounds of acidic or basic pH, strong solvents, oil based paints or stains, metallic rust, concrete or masonry products, air or water borne minerals and other abnormal residential deck use items. See limitations below for further details.

#### Fade Resistance:

Fiberon warrants that Fiberon Horizon Decking will resist color change from light and weathering exposure as measured by color change in excess of 5 Delta E (Hunter) units for a period of twenty five years from the date of purchase.

#### Exclusions from Stain and Fade Warranty Coverage:

Fiberon does not warrant its Fiberon Horizon Decking products to be stain or fade proof. The surface of Fiberon Horizon Decking is engineered to offer ultra-low maintenance performance. When used with proper design and construction practices and for use in the residential exterior deck environment, Fiberon Horizon products provide a high level of stain and fade resistance.

#### Stain Resistance:

Care must be taken to remove spilled materials with soap and water and standard household cleaners immediately and within a week after the occurrence of the spill. If after this initial cleaning the stains remain, refer to Fiberon's Care and Maintenance Instructions found on [www.fiberondecking.com](http://www.fiberondecking.com). Fiberon does not warrant stain resistance resulting from spilled or otherwise applied substances that are not properly cleaned with soap and water or mild household cleaners. Materials not covered in the stain resistant warranty include, but are not limited to, abrasive compounds of acidic or basic pH, strong solvents, oil based paints or stains, metallic rust or other abnormal residential deck use items, non-food and non-beverage substances, including for example, but not limited to, fungicides, bactericides, biocides, plant food, pet or human stains such as vomit, blood, urine and feces and mineral staining or hazing caused by masonry work, windblown dust or mineral laden water.

#### Fade Resistance:

Fiberon Horizon Decking surface technology is designed to resist fading. No material is fade proof when exposed to years of UV exposure and the elements. Other exclusions include direct or indirect contact with extreme heat sources (over 250 degrees).

#### Surface Damage:

Never use METAL shovels or sharp edge tools to remove snow and ice on the surface of any Fiberon composite or PVC decking product. If the surface of Fiberon Horizon Decking is damaged or punctured after the decking is installed, the twenty five year stain and fade resistance will be voided.

#### Paint or Other Surfaces Applied to Fiberon Horizon Decking:

If paint or other coating materials are applied to the Fiberon Horizon Decking surface, the twenty five year stain and fade resistant will be voided.

For the warranty period stated, compliance with the recommended deck care and maintenance procedures must be followed. To qualify for coverage, you must have tried cleaning the affected area of your deck using the instructions indicated within this document and within the Care and Maintenance Instructions provided online at [www.fiberondecking.com](http://www.fiberondecking.com). If the affected area still remains unsatisfactory after you have tried these cleaning procedures, then you must have the affected area of your deck professionally cleaned at your expense. If the affected area remains unsatisfactory after the professional cleaning, you must contact Fiberon Consumer Support (800-573-8841) and provide proof of the professional cleaning within 30 days of the professional cleaning.

#### Remedy

Purchaser's sole remedy for any claim whatsoever arising out of the purchase, use, storage or possession of Fiberon products (whether such claim arises in contract, warranty, tort, strict liability or otherwise), including without limitation any claim that Fiberon products failed to perform as warranted above, shall be replaced with new Fiberon product in an amount equal to the volume of defective material as listed on the Prorated Warranty Schedule. Replacement material will be provided that is as close as possible in color, design and quality to the original installation, but we do not guarantee an exact match as colors and designs will change. Additionally, claimant agrees to the use of surface fasteners as adequate for reinstallation of the furnished board, irrespective of existing method. Warrantor may elect to refund the percentage of the original purchase price listed on the Prorated Warranty Schedule in lieu of replacing the product or if Fiberon deems the repair is not commercially practicable or cannot be made in a timely manner.

This Warranty does not cover costs of installation, removal or reinstallation. The Warrantor's sole obligation is limited

to replacement of the Product, and Warrantor shall have no further liability of obligation except as expressly stated herein. In no event will Fiberon be liable for any incidental, special, indirect or consequential damages resulting from any defect in the Product supplied, including but not limited to, damage to property. Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation may not apply to you.

Any owner seeking remedy under this warranty must notify Fiberon in writing within 30 days after discovering a possible nonconformity of the Product, and before beginning any permanent repair. This written notice should describe the possible nonconformity and include the date the Product was installed. Immediately upon discovering any possible nonconforming Product, the owner must make temporary repairs at the owner's expense to protect all property that could be affected. The owner must allow Fiberon to enter the property into which the Product is installed to inspect the possibility of nonconforming Product. This warranty gives you specific legal rights and you may also have other rights which vary from state to state.

#### Limitations and Disclaimers

Warrantor shall not be liable for installation, removal or reinstallation costs or for any indirect, punitive, exemplary or consequential damages of any kind. Fiberon does not warrant against and is not responsible for, and no implied warranty shall be deemed to cover, any condition attributable to: (1) improper installation of Fiberon products and/or failure to abide by Fiberon's installation guidelines, including but not limited to improper gapping; (2) use of Fiberon products beyond normal use or in an application not recommended by Fiberon's guidelines and local building codes; (3) movement, distortion, collapse or settling of the ground or the supporting structure on which Fiberon products are installed; (4) Defects to or failure arising from decking structure resulting from water caused by improper installation, workmanship, maintenance or repair; (5) any act of God (such as flooding, hurricane, earthquake, lightning, etc.); (6) discoloration caused by aggressive atmospheric pollutants including but not limited to metallic oxides or particles and airborne mold or mildew; (7) staining from foreign substances such as dirt, grease, oil, harsh chemicals found in cleaners or normal weathering (defined as natural efflorescence, exposure to sunlight, weather and atmospheric conditions which will cause any colored surface to gradually fade, flake, chalk, or accumulate dirt or stains); (8) damage resulting from fire or exposure to excessive heat sources such as cooking devices or retro-reflective surfaces; (9) the application of improper paints, stains, surface treatments or other chemical substances including but not limited to non-recommended cleaners or pesticides; (10) climate change or any other cause beyond the control of Fiberon; (11) variations or changes in color of Fiberon products; (12) improper handling, storage, abuse or neglect of Fiberon products by Purchaser or third parties; (13) ordinary wear and tear; (14) impact from foreign objects; or (15) any fasteners not supplied or approved by Fiberon.

The purchaser is solely responsible for determining whether Fiberon product meets the requirements of any applicable safety code or similar regulation.

No Fiberon dealer, installer, reseller, agent or employee is authorized to make any modification, extension or addition to this Warranty. No person or entity is authorized by Warrantor to make any statement or representation, as to the quality or performance of Fiberon product, other than as contained in this Limited Warranty and it may not be altered except in a written instrument signed by Warrantor and buyer. Some states do not allow limitation on how long any implied warranty lasts and/or the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you. This warranty gives you specific legal rights and you may also have other rights that vary from state to state.

#### Warranty Claim Procedure

To obtain replacement, the original owner must send a copy of this warranty certificate, copy of original proof of purchase and photos of the issue to the address below. Such proof of purchase must be from an authorized Fiberon product dealer and must show (1) the date of the purchase and (2) that sufficient Fiberon product has been purchased to cover the number of lineal feet claimed to be damaged. Fiberon must make a determination on the claim before any permanent repairs or removal of materials may be undertaken.

# Fiberon Pro-Tect® Decking

## 20-Year Residential Limited Warranty, 10-Year Commercial Limited Warranty and 20-Year Residential Stain and Fade Limited Warranty

Fiberon warrants Fiberon Pro-Tect Decking from the date of the original purchase from an authorized Fiberon product dealer shall remain free from material manufacturing defects, and under normal and proper service conditions will not check, splinter, delaminate, rot or suffer structural damage from fungal decay when used in conjunction with an above ground application, under normal use and is installed and maintained according to manufacturer's guidelines.

Fiberon Phantom Fasteners are warranted from the date of proof of purchase against defects in material and workmanship when installed according to manufacturer's installation instructions. This warranty excludes rot. For best results, use only Fiberon branded or approved surface and/or hidden fasteners listed on our website, [www.fiberondecking.com](http://www.fiberondecking.com). Fiberon branded hidden fasteners are specifically designed to provide optimum performance when used with Fiberon deck boards. The use of other types of fasteners may void the Fiberon warranty if it is determined that deck board failures resulted from the use of a non-approved fastener.

The term of warranty shall be twenty (20) years from original purchase date for a residential purchaser and ten (10) years from original purchase date for a commercial purchaser. The Commercial Limited Warranty may be transferred one (1) time, within the five (5) year period beginning from the date of original purchase by Purchaser to a subsequent buyer of the property upon which the Fiberon Pro-Tect Decking Products were originally installed.

### 20-Year Residential Stain and Fade Performance Limited Warranty Coverage

Fiberon warrants the stain and fade resistance of Fiberon Pro-Tect Decking when properly installed and used as decking in residential applications. This warranty applies to all Fiberon Pro-Tect Decking products manufactured by Fiberon and is extended to the original homeowner (Purchaser), as long as they own the residence upon which the decking materials are installed.

#### Stain Resistance:

Fiberon warrants that Fiberon Pro-Tect Decking is resistant to permanent staining for a period of twenty years from date of residential consumer purchase resulting from spills of food and beverage items that would typically be present on a residential deck. Spills should be removed from the decking material with soap and water and mild household cleaners immediately and no later than one week of exposure to the surface. If after this initial cleaning the stains remain, refer to Fiberon's Care and Maintenance Instructions found on [www.fiberondecking.com](http://www.fiberondecking.com). Materials not covered in the stain resistant warranty include, but are not limited to, abrasive compounds of acidic or basic pH, strong solvents, oil based paints or stains, metallic rust, concrete or masonry products, air or water borne minerals and other abnormal residential deck use items. See limitations below for further details.

#### Fade Resistance:

Fiberon warrants that Fiberon Pro-Tect Decking will resist color change from light and weathering exposure as measured by color change in excess of 5 Delta E (Hunter) units for a period of twenty years from the date of purchase.

#### Exclusions from Stain and Fade Warranty Coverage:

Fiberon does not warrant its Fiberon Pro-Tect Decking products to be stain or fade proof. The surface of Fiberon Pro-Tect Decking is engineered to offer ultra-low maintenance performance. When used with proper design and construction practices and for use in the residential exterior deck environment, Fiberon Pro-Tect products provide a high level of stain and fade resistance.

#### Stain Resistance:

Care must be taken to remove spilled materials with soap and water and standard household cleaners immediately and within a week after the occurrence of the spill. If after this initial cleaning the stains remain, refer to Fiberon's Care and Maintenance Instructions found on [www.fiberondecking.com](http://www.fiberondecking.com). Fiberon does not warrant stain resistance resulting from spilled or otherwise applied substances that are not properly cleaned with soap and water or mild household cleaners. Materials not covered in the stain resistant warranty include, but are not limited to, abrasive compounds of acidic or basic pH, strong solvents, oil based paints or stains, metallic rust or other abnormal residential deck use items, non-food and non-beverage substances, including for example, but not limited to, fungicides, bactericides, biocides, plant food, pet or human stains such as vomit, blood, urine and feces and mineral staining or hazing cause by masonry work, windblown dust or mineral laden water.

#### Fade Resistance:

Fiberon Pro-Tect Decking surface technology is designed to resist fading. No material is fade proof when exposed to years of UV exposure and the elements. Other exclusions include direct or indirect contact with extreme heat sources (over 250 degrees).

#### Surface Damage:

Never use METAL shovels or sharp edge tools to remove snow and ice on the surface of any Fiberon composite or PVC decking product. If the surface of Fiberon Pro-Tect Decking is damaged or punctured after the decking is installed, the twenty year stain and fade resistance will be voided.

#### Paint or Other Surfaces Applied to Fiberon Pro-Tect Decking:

If paint or other coating materials are applied to the Fiberon Pro-Tect Decking surface, the twenty year stain and fade resistant will be voided.

For the warranty period stated, compliance with the recommended deck care and maintenance procedures must be followed. To qualify for coverage, you must have tried cleaning the affected area of your deck using the instructions indicated within this document and within the Care and Maintenance Instructions provided online at [www.fiberondecking.com](http://www.fiberondecking.com). If the affected area still remains unsatisfactory after you have tried these cleaning procedures, then you must have the affected area of your deck professionally cleaned at your expense. If the affected area remains unsatisfactory after the professional cleaning, you must contact Fiberon Consumer Support (800-573-8841) and provide proof of the professional cleaning within 30 days of the professional cleaning.

#### Remedy

Purchaser's sole remedy for any claim whatsoever arising out of the purchase, use, storage or possession of Fiberon products (whether such claim arises in contract, warranty, tort, strict liability or otherwise), including without limitation any claim that Fiberon products failed to perform as warranted above, shall be replaced with new Fiberon product in an amount equal to the volume of defective material as listed on the Prorated Warranty Schedule. Replacement material will be provided that is as close as possible in color, design and quality to the original installation, but we do not guarantee an exact match as colors and designs will change. Additionally, claimant agrees to the use of surface fasteners as adequate for reinstallation of the furnished board, irrespective of existing method. Warrantor may elect to refund the percentage of the original purchase price listed on the Prorated Warranty Schedule in lieu of replacing the product or if Fiberon deems the repair is not commercially practicable or cannot be made in a timely manner.

This Warranty does not cover costs of installation, removal or reinstallation. The Warrantor's sole obligation is limited to replacement of the Product, and Warrantor shall have no further liability of obligation except as expressly stated

herein. In no event will Fiberon be liable for any incidental, special, indirect or consequential damages resulting from any defect in the Product supplied, including but not limited to, damage to property. Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation may not apply to you.

Any owner seeking remedy under this warranty must notify Fiberon in writing within 30 days after discovering a possible nonconformity of the Product, and before beginning any permanent repair. This written notice should describe the possible nonconformity and include the date the Product was installed. Immediately upon discovering any possible nonconforming Product, the owner must make temporary repairs at the owner's expense to protect all property that could be affected. The owner must allow Fiberon to enter the property into which the Product is installed to inspect the possibility of nonconforming Product. This warranty gives you specific legal rights and you may also have other rights which vary from state to state.

#### Limitations and Disclaimers

Warrantor shall not be liable for installation, removal or reinstallation costs or for any indirect, punitive, exemplary or consequential damages of any kind. Fiberon does not warrant against and is not responsible for, and no implied warranty shall be deemed to cover, any condition attributable to: (1) improper installation of Fiberon products and/or failure to abide by Fiberon's installation guidelines, including but not limited to improper gapping; (2) use of Fiberon products beyond normal use or in an application not recommended by Fiberon's guidelines and local building codes; (3) movement, distortion, collapse or settling of the ground or the supporting structure on which Fiberon products are installed; (4) Defects to or failure arising from decking structure resulting from water caused by improper installation, workmanship, maintenance or repair; (5) any act of God (such as flooding, hurricane, earthquake, lightning, etc.); (6) discoloration caused by aggressive atmospheric pollutants including but not limited to metallic oxides or particles and airborne mold or mildew; (7) staining from foreign substances such as dirt, grease, oil, harsh chemicals found in cleaners or normal weathering (defined as natural efflorescence, exposure to sunlight, weather and atmospheric conditions which will cause any colored surface to gradually fade, flake, chalk, or accumulate dirt or stains); (8) damage resulting from fire or exposure to excessive heat sources such as cooking devices or retro-reflective surfaces; (9) the application of improper paints, stains, surface treatments or other chemical substances including but not limited to non-recommended cleaners or pesticides; (10) climate change or any other cause beyond the control of Fiberon; (11) variations or changes in color of Fiberon products; (12) improper handling, storage, abuse or neglect of Fiberon products by Purchaser or third parties; (13) ordinary wear and tear; (14) impact from foreign objects; or (15) any fasteners not supplied or approved by Fiberon.

The purchaser is solely responsible for determining whether Fiberon product meets the requirements of any applicable safety code or similar regulation.

No Fiberon dealer, installer, reseller, agent or employee is authorized to make any modification, extension or addition to this Warranty. No person or entity is authorized by Warrantor to make any statement or representation, as to the quality or performance of Fiberon product, other than as contained in this Limited Warranty and it may not be altered except in a written instrument signed by Warrantor and buyer. # Fiberon Classic™ Decking, Professional Decking, and Horizon® Railing

## 20-Year Residential Limited Warranty and 5-Year Commercial Limited Warranty

Fiberon warrants the following products from the date of the original purchase from an authorized Fiberon product dealer shall remain free from material manufacturing defects, and under normal and proper service conditions will not check, splinter, delaminate, rot or suffer structural damage from fungal decay when used in conjunction with an above ground application, under normal use and is installed and maintained according to manufacturer's guidelines.

**Decking:** Fiberon Classic Decking, Fiberon Professional Decking  
**Railing:** Fiberon Horizon® Railing - Mission, Provincial, Inspirations® and Fiberal®  
**Fasteners:** Fiberon branded Hidden Fasteners as listed on [www.fiberondecking.com](http://www.fiberondecking.com)

Fiberon Phantom Fasteners are warranted from the date of proof of purchase against defects in material and workmanship when installed according to manufacturer's installation instructions. This warranty excludes rust. For best results, use only Fiberon branded or those approved hidden fasteners listed on our web site, [www.fiberondecking.com](http://www.fiberondecking.com). Fiberon branded hidden fasteners are specifically designed to provide optimum performance when used with Fiberon deck boards. The use of other types of fasteners may void the Fiberon warranty if it is determined that deck board failures resulted from the use of non-approved fasteners.

The term of warranty shall be twenty (20) years from original purchase date for a residential purchaser for Fiberon Classic Decking, Horizon Inspirations, Mission and Fiberal Railing; and five (5) years from original purchase date for a commercial purchaser for Fiberon Classic Decking.

### Remedy

Purchaser's sole remedy for any claim whatsoever arising out of the purchase, use, storage or possession of Fiberon products (whether such claim arises in contract, warranty, tort, strict liability or otherwise), including without limitation any claim that Fiberon products failed to perform as warranted above, shall be replaced with new Fiberon product in an amount equal to the volume of defective material as listed on the Prorated Warranty Schedule. Replacement material will be provided that is as close as possible in color, design and quality to the original installation, but we do not guarantee an exact match as colors and designs will change. Additionally, claimant agrees to the use of surface fasteners as adequate for reinstallation of the furnished board, irrespective of existing method. Warrantor may elect to refund the percentage of the original purchase price listed on the Prorated Warranty Schedule in lieu of replacing the product or if Fiberon deems the repair is not commercially practicable or cannot be made in a timely manner.

This Warranty does not cover costs of installation, removal or reinstallation. The Warrantor's sole obligation is limited to replacement of the Product, and Warrantor shall have no further liability of obligation except as expressly stated herein. In no event will Fiberon be liable for any incidental, special, indirect or consequential damages resulting from any defect in the Product supplied, including but not limited to, damage to property. Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation may not apply to you.

Any owner seeking remedy under this warranty must notify Fiberon in writing within 30 days after discovering a possible nonconformity of the Product, and before beginning any permanent repair. This written notice should describe the possible nonconformity and include the date the Product was installed. Immediately upon discovering any possible nonconforming Product, the owner must make temporary repairs at the owner's expense to protect all property that could be affected. The owner must allow Fiberon to enter the property into which the Product is installed to inspect the possibility of nonconforming Product. This warranty gives you specific legal rights and you may also have other rights which vary from state to state.

### Limitations and Disclaimers

Warrantor shall not be liable for installation, removal or reinstallation costs or for any indirect, punitive, exemplary or consequential damages of any kind. Fiberon does not warrant against and is not responsible for, and no implied warranty shall be deemed to cover, any condition attributable to: (1) improper installation of Fiberon products and/or failure to abide by Fiberon's installation guidelines, including but not limited to improper gapping; (2) use of Fiberon products beyond normal use or in an application not recommended by Fiberon's guidelines and local building codes; (3) movement, distortion, collapse or settling of the ground or the supporting structure on which Fiberon products are installed; (4) Defects to or failure arising from decking structure resulting from water caused by improper installation, workmanship, maintenance or repair; (5) any act of God (such as flooding, hurricane, earthquake, lightning, etc.); (6) discoloration caused by aggressive atmospheric pollutants including but not limited to metallic oxides or particles and airborne mold or mildew; (7) staining from foreign substances such as dirt, grease, oil, harsh chemicals found in cleaners or normal weathering (defined as natural efflorescence, exposure to sunlight, weather and atmospheric conditions which will cause any colored surface to gradually fade, flake, chalk, or accumulate dirt or stains); (8) damage resulting from fire or exposure to excessive heat sources such as cooking devices or retro-reflective surfaces; (9) the application of improper paints, stains, surface treatments or other chemical substances including but not limited to non-recommended cleaners or pesticides; (10) climate change or any other cause beyond the control of Fiberon; (11) variations or changes in color of Fiberon products; (12) improper handling, storage, abuse or neglect of Fiberon products by Purchaser or third parties; (13) ordinary wear and tear; (14) impact from foreign objects; or (15) any fasteners not supplied or approved by Fiberon.

The purchaser is solely responsible for determining whether Fiberon product meets the requirements of any applicable safety code or similar regulation.

No Fiberon dealer, installer, reseller, agent or employee is authorized to make any modification, extension or addition to this Warranty. No person or entity is authorized by Warrantor to make any statement or representation, as to the quality or performance of Fiberon product, other than as contained in this Limited Warranty and it may not be altered except in a written instrument signed by Warrantor and buyer. Some states do not allow limitation on how long any implied warranty lasts and/or the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you. This warranty gives you specific legal rights and you may also have other rights that vary from state to state.

### Warranty Claim Procedure

To obtain replacement, the original owner must send a copy of this warranty certificate, copy of original proof of purchase and photos of the issue to the address below. Such proof of purchase must be from an authorized Fiberon product dealer and must show (1) the date of the purchase and (2) that sufficient Fiberon product has been purchased to cover the number of lineal feet claimed to be damaged. Fiberon must make a determination on the claim before any permanent repairs or removal of materials may be undertaken.

# Fiberon - Care and Maintenance

## Outdoor Flooring, Horizon® and Pro-Tect® Decking

For the most up-to-date information and specifications, visit [www.fiberondecking.com](http://www.fiberondecking.com).

### Important Considerations

- Ensure minimum six inches of ventilation under deck substructure and required spacing between decking boards.
- Improve drainage or grade soil to eliminate standing water under decks.
- Direct downspouts, downspout extensions and splash guards away from decks.
- Position dryer vents away from decks.
- Maintain a deck that is dry and clean.
- Clean your deck as often as needed, at least twice each year.
- Use extreme caution with pressure washers and use at pressures less than 1,500 psi at 12" above deck surface. Pressure washing is not recommended when mold/mildew are present on the deck.
- Keep debris out of gaps between the decking boards so rain showers can remove pollen and organic debris between cleanings.
- Minimize the use of wet mulch up against the deck structure.
- Items stored directly on top of the deck surface, such as flower pots, prohibit water evaporation and can cause some staining of the deck surface.

### Ventilation

Make sure there is adequate and unobstructed air flow under the deck to prevent excessive water absorption. Improve drainage or grade flat areas where standing water may gather. For decks with limited ventilation, six inches of clear ventilation is required between bottom of joists and fascia to grade.

### Mind the Gap

If the gap between decking boards is less than 3/16", organic debris such as leaves, seeds or pollen can settle on the deck and clog gaps. Water can pool, steeping organic debris that forms a "tea" or of tannin which may stain your deck. This organic debris is a strong food source for mold. Keeping the gap clean is the easiest way to keep the deck clean. If gapping becomes clogged, use a garden hose, a spatula, putty knife or similar tool to remove debris.

### Clean Your Deck

Clean your deck as often as needed, at least twice each year to remove pollen, organic debris, dirt or stains. Generally, a broom or a blower will work better than a hose for removing scattered organic materials like leaves. For general cleaning, use soap and water or mild household cleaners.

### Masonry Construction

It is important to protect decking during masonry construction. White or hazy residue from mineral deposits (efflorescence) can leach out of stone and masonry materials after water evaporates leaving the deposits behind. Minerals from soils in certain arid and mountainous environments can also cause a hazing affect when deposited on the deck surface.

This can only be prevented with complete and secure coverage of the decking surface area during the construction phase or installation of the decking after the masonry construction phase. To minimize this affect during masonry construction, keep materials dry and allow masonry and cement to cure properly.

For mineral deposits left on the decking surface, periodic cleaning is required to maintain visual attractiveness. Fiberon developed Fiberon Composite Deck Cleaner specifically formulated for, and effective in cleaning dirt, clay, mud, soil, mineral deposits and masonry and effluo residue. Be sure to follow the label instructions. Do not mix recommended cleaning products together as harmful chemical reactions could occur.

### Important Ladder Usage Safety Instructions

When using a ladder, place the ladder on a piece of 3/4" plywood firmly secured to the deck surface to disperse the load of the ladder's feet to nearby underlying joists. Drill fasteners downward through the top of the plywood sheet, into the deck board gaps and into the joists to keep the plywood from slipping. This avoids leaving holes in your decking once the plywood sheet is removed. Be sure to follow the ladder manufacturer's instructions and safety tips.

### Mold and Mildew

Mold and mildew are common environmental conditions. Molds grow on decaying organic material such as wood, leaf decay and pollen. Tiny and lightweight, mold spores travel easily through the air. Different climates experience varying degrees of these conditions depending on the amount of moisture and heat present.

To thrive, mold and mildew need air, water, elevated temperatures and a food source. There is no way to eliminate all these conditions in the environment. A wide variety of building materials including concrete, wood products, vinyl siding and many others are subject to potential mold growth.

To minimize mold on your decking, clean your deck as often as needed, at least twice each year. Climate conditions vary in different regions of the country and may necessitate more periodic cleaning. Removal of leaves, debris, and other organic materials that provide a food source for mold development is important. If mold is present on your deck, use soap and water to clean. For more information on cleaning mold and mildew, see Fiberon Technical Bulletin # 13 at this link, <http://www.fiberondecking.com/design/literatureCenter>.

### Dirt and Grime

Dislodge accumulated dirt with a broom or by using soap and water and a non-metal scrub brush. Scrubbing in the direction of the grain is best. Thoroughly rinse off with a garden hose. Skilled professionals may use a pressure washer with wide fan tips, at low pressures under 1,500 psi and at safe distances, 12" above deck. In the wrong hands, your composite deck can be damaged. Exercise extreme caution.

### Oil and Grease Stains

Speedy clean up is best. To clean grease and oil stains that soap and water cannot remove, some all purpose cleaners, such as Fantastik, will cut through grease and grime. Or use a commercial deck cleaner designed specifically for your type of decking. De-Solv-It Citrus Solution is effective in removing tar, asphalt, oil, grease and chewing gum. Be sure to follow the manufacturer's recommendations and test in an inconspicuous area prior to cleaning the entire deck.

### Salt and Calcium Chloride

Build up of salt and calcium chloride from snow and ice removal is easily removed with enough water and perhaps a light scrub. Use a garden hose or sprayer. If using a pressure washer, use at low pressures under 1,500 psi and at safe distances, 12" above deck, to avoid damaging your deck. Never use METAL shovels or sharp edged tools to remove snow and ice on the surface of any Fiberon composite or PVC decking product.

### Fire and Unusual Heat Sources

Composite decking will retain heat when exposed to direct or reflective sunlight. Exercise caution if walking barefoot as footwear may be required. Fire and unusual sources of heat and heat build-up can possibly damage Fiberon decking surfaces. Examples would include fire, reflected light from different types of glass (ex. low-e glass), fire features and under-deck waterproofing installations that do not provide the 6"(15 cm) of unobstructed net free ventilation.

#### • Low-E Glass/Reflected Heat

Low-emissivity glass is designed to prevent heat gain inside the house by reflecting sunlight outward. This reflective property can result in excessive heat build on the surface of Fiberon decking. The properties that Low-E glass employs to prevent passive heat gain within a structure can result in unusual heat build-up on exterior surfaces

When the sunlight is reflected and concentrated it can harm a range of building materials that include doors, windows, siding, trim and decking. Damage caused to these products can include melting, sagging, warping, discoloration, increased expansion and contraction, and accelerated weathering.

If you have questions on how to reduce this risk, contact the manufacturer of the product which contains the Low-E glass for suggestions on how to reduce or eliminate the reflected heat.

#### • Under-deck waterproofing systems

Under-deck waterproofing systems, properly installed, can provide additional living or storage space. Improper installations are those that restrict air flow and result in build-up of heat and/or humidity which can result in unwanted consequences. Contact the manufacturer of the specific under-deck waterproofing system for installation instructions to ensure the required 6" (15 cm) of unobstructed ventilation is achieved for Fiberon decking. If already installed, seek methods to achieve the ventilation requirement.

#### • Fire Features/Fire Pits

Fire features and fire pits are increasingly popular in outdoor living environments. Fire can damage many building products including Fiberon decking. Improperly installed fire features and fire pits can cause damage to the surface of Fiberon decking via direct exposure to the flame or excessive radiated heat. Proper caution should be taken when designing, installing and using these features to ensure damage does not result.

### Static

Dry or windy environments may create a temporary condition of static electricity, which will vary depending on climate and site conditions.

# Fiberon® - Care and Maintenance

## Professional and Classic Composite Decking

### Important Considerations

- Ensure minimum 6 in. ventilation under deck substructure and required spacing between decking boards.
- Improve drainage or grade soil to eliminate standing water under decks.
- Direct downspouts, downspout extensions and splash guards away from decks.
- Position dryer vents away from decks.
- Maintain a deck that is dry and clean.
- Clean your deck as often as needed, at least twice each year.
- Use extreme caution with pressure washers and use at pressures less than 1,500 psi at 12 in. above deck surface. Pressure washing is not recommended when mold/mildew are present on the deck.
- Keep debris out of gaps between the decking boards so rain showers can remove pollen and organic debris between cleanings.
- Minimize the use of wet mulch up against the deck structure.
- Items stored directly on top of the deck surface, such as flower pots, prohibit water evaporation and can cause some staining of the deck surface.
- Use of wrought iron railing or other carbon steel materials in contact with or above an uncapped composite deck surface may cause dark extractive staining.

### Ventilation

Make sure there is adequate and unobstructed air flow under the deck to prevent excessive water absorption. Improve drainage or grade flat areas where standing water may gather. For decks with limited ventilation, 6 in. of clear ventilation is required beneath substructure.

### Mind the Gap

If the gap between decking boards is less than 3/16 in., organic debris such as leaves, seeds or pollen can settle on the deck and clog gaps. Water can pool, steeping organic debris that forms a "tea" or of tannin which may stain your deck. This organic debris is a strong food source for mold. Keeping the gap clean is the easiest way to keep the deck clean. If gapping becomes clogged, use a garden hose, a spatula, putty knife or similar tool to remove debris.

### Clean Your Deck

Clean your deck as often as needed, at least twice each year to remove pollen, organic debris, dirt or stains. Generally, a broom or a blower will work better than a hose for removing scattered organic materials like leaves. For general cleaning, use soap and water or mild household cleaners.

### Dirt and Grime

Dislodge accumulated dirt with a broom or by using soap and water and a non-metal scrub brush. Scrubbing in the direction of the grain is best. Thoroughly rinse off with a garden hose. Skilled professionals may use a pressure washer with wide fan tips, at low pressures under 1,500 psi and at safe distances, 12 in. above deck. In the wrong hands, your composite deck can be damaged. Exercise extreme caution.

### Oil and Grease Stains

Speedy clean up is best. To clean grease and oil stains that soap and water cannot remove, some all purpose cleaners, such as Fantastik, will cut through grease and grime. Or use a commercial deck cleaner designed specifically for your type of decking. De-Solv-It Citrus Solution is effective in removing tar, asphalt, oil, grease and chewing gum. Be sure to follow the manufacturer's recommendations and test in an inconspicuous area prior to cleaning the entire deck.

### Important Ladder Usage Safety Instructions

When using a ladder, place the ladder on a piece of 3/4 in. plywood firmly secured to the deck surface to disperse the load of the ladder's feet to nearby underlying joists. Drill fasteners downward through the top of the plywood sheet, into the deck board gaps and into the joists to keep the plywood from slipping. This avoids leaving holes in your decking once the plywood sheet is removed. Be sure to follow the ladder manufacturer's instructions and safety tips.

### Mold and Mildew

Mold and mildew are common environmental conditions. Molds grow on decaying organic material such as wood, leaf decay and pollen. Tiny and lightweight, mold spores travel easily through the air. Different climates experience varying degrees of these conditions depending on the amount of moisture and heat present.

To thrive, mold and mildew need air, water, elevated temperatures and a food source. There is no way to eliminate all these conditions in the environment. A wide variety of building materials including concrete, wood products, vinyl siding and many others are subject to potential mold growth. To minimize mold on your decking, clean your deck as often as needed, at least twice each year. Climate conditions vary in different regions of the country and may necessitate more periodic cleaning. Removal of leaves, debris, and other organic materials that provide a food source for mold development is important. If mold is present on your deck, there are many commercial products available for cleaning mold. We recommend the following commercial cleaners. For best results, be sure to follow the manufacturer's instructions and use cleaners within their stated shelf life. Do not mix recommended cleaning products together as harmful chemical reactions could occur. Never mix bleach and acids.

Collier Manufacturing 30-Seconds® Outdoor Cleaner and 30-Seconds® Spray & Walk Away are heavy duty, mildly alkaline chlorinated mold and mildew removers/cleaners that are biodegradable once rinsed into the soil. Both have been tested and perform very well in removing mold and mildew and retarding its return.

For the most up-to-date information and specifications, visit [www.fiberondecking.com](http://www.fiberondecking.com).

For environments prone to high mold growth, there are several options available that are effective on uncapped composite boards.

Fiberon tested with excellent results, a coating option for areas in the country with high mold prone environments. Using the 30-day ASTM D3273 mold test, there was no mold growth after applying the weatherproofing finish. We have found the following coatings effective on uncapped composite boards when applied and maintained as per the manufacturer's instructions.

- Behr Premium Transparent Deck, Fence, and Siding Weatherproofing Wood Finish at <http://www.behr.com>. This is a transparent stain that can darken and rejuvenate the faded deck color. Please test in an inconspicuous area prior to full application. Proper application can last up to four years on decks and six years on fencing.
- Behr Premium Solid Color Deck, Fence and Siding Weatherproofing Wood Stain. This solid colored stain is offered in all Fiberon composite decking solid colors. Proper application can last up to 10 years on decks and 25 years on fencing.

For more information on cleaning mold and mildew, see Fiberon Technical Bulletin # 13 at this link, <http://www.fiberondecking.com/design/literatureCenter>.

### Tannin Stains

Tannins naturally occur in all wood species and sometimes migrate to the surface where wood fibers are exposed to sun and water. Tannin stains tend to disappear naturally after removal of standing water under mats, flower pots or umbrella stands where water is trapped for longer periods of time. To hasten removal of tannin stains, use a commercial deck cleaner designed specifically for your type of decking, strictly following the manufacturer's instructions. One effective treatment is a mixture of one cup TSP, one cup bleach and one gallon warm water, applied with a long-handled deck. To help protect landscaping, we recommend wetting down landscaping prior to treatment.

### Salt and Calcium Chloride

Build up of salt and calcium chloride from snow and ice removal is easily removed with enough water and perhaps a light scrub. Use a garden hose or sprayer. If using a pressure washer, use at low pressures under 1,500 psi and at safe distances, 12 in. above deck, to avoid damaging your deck. Never use METAL shovels or sharp edged tools to remove snow and ice on the surface of any Fiberon composite or PVC decking product.

### Construction Chalk

Colored chalk, used in construction for marking straight lines prior to cutting, is permanent on most surfaces. Contact the manufacturer of the specific brand and color of chalk for a cleaning solution that may prove effective. The best advice is to avoid colored chalk, using workable alternatives such as white chalk or baby powder.

### Fire and Unusual Heat Sources

Composite decking will retain heat when exposed to direct or reflective sunlight. Exercise caution if walking barefoot as footwear may be required. Fire and unusual sources of heat and heat build-up can possibly damage Fiberon decking surfaces. Examples would include fire, reflected light from different types of glass (ex. low-e glass), fire features and under-deck waterproofing installations that do not provide the 6 in. (15 cm) of unobstructed net free ventilation.

#### • Low-E Glass/Reflected Heat

Low-emissivity glass is designed to prevent heat gain inside the house by reflecting sunlight outward. This reflective property can result in excessive heat build on the surface of Fiberon decking. The properties that Low-E glass employs to prevent passive heat gain within a structure can result in unusual heat build-up on exterior surfaces. When the sunlight is reflected and concentrated it can harm a range of building materials that include doors, windows, siding, trim and decking. Damage caused to these products can include melting, sagging, warping, discoloration, increased expansion and contraction, and accelerated weathering. If you have questions on how to reduce this risk, contact the manufacturer of the product which contains the Low-E glass for suggestions on how to reduce or eliminate the reflected heat.

#### • Under-deck waterproofing systems

Under-deck waterproofing systems, properly installed, can provide additional living or storage space. Improper installations are those that restrict air flow and result in build-up of heat and/or humidity which can result in unwanted consequences. Contact the manufacturer of the specific under-deck waterproofing system for installation instructions to ensure the required 6 in. (15 cm) of unobstructed ventilation is achieved for Fiberon decking. If already installed, seek methods to achieve the ventilation requirement.

#### • Fire Features/Fire Pits

Fire features and fire pits are increasingly popular in outdoor living environments. Fire can damage many building products including Fiberon decking. Improperly installed fire features and fire pits can cause damage to the surface of Fiberon decking via direct exposure to the flame or excessive radiated heat. Proper caution should be taken when designing, installing and using these features to ensure damage does not result.

### Static

Dry or windy environments may create a temporary condition of static electricity, which will vary depending on climate and site conditions.
